

Tax rate for sales of communication power batteries

Do I have to charge VAT if I make taxable supplies?

If you're registered for VAT, you have to charge VAT when you make taxable supplies. What qualifies and the VAT rate you charge depends on the type of goods or services you provide. No VAT is charged on goods or services that are: This guide to goods and services and their VAT rates is not a complete list.

Are battery storage systems exempt from VAT?

Effective 1st February 2024, battery storage systems will be exempt from 20% VAT and charged 0% instead. The tax break aims to incentivise consumer uptake and support the transition to renewable energy. It applies to all battery storage deployments including retrofitted and off-grid systems.

What is the VAT rate for solar energy?

However, at this point, it will be subjected to 5% VAT rather than returning to the previous 20% VAT rate. You will save more money by investing in your home solar energy system before this date, but even after this cut-off, the VAT is still lower than it was previously.

Will the government grant VAT relief on energy storage batteries?

In a much-needed move towards energy efficiency, the government has unveiled plans to grant VAT relief on the installation of energy storage batteries. This welcome move extends far beyond the previous VAT relief policy, which was limited to batteries installed concurrently with solar panels.

Are fuel and power supplies subject to VAT?

Unless otherwise specified legal references will be from the VAT Act 1994 (VATA 1994). Under the act supplies of fuel and power are subject to the standard rate of VAT unless they are eligible for the reduced rate under schedule 7A or being exported outside the UK under the conditions set out in VAT on goods exported from the UK (VAT Notice 703).

Will a VAT cut increase demand for home battery energy storage?

"The cut in VAT is exceedingly welcome and we have every expectation that it will increase demand for home battery energy storage," said Chris Hewett, chief executive of trade association Solar Energy UK. "By allowing solar power to be used after dark, it can double the savings offered by home solar power systems.
