

The Ministry of Industry and Information Technology's latest response to battery companies

What's new in China's Lithium-ion battery industry?

BEIJING, June 19 -- China's Ministry of Industry and Information Technology on Wednesday unveiled revised guidelines for the lithium-ion battery industry to further strengthen standardized management and promote the high-quality development of the sector.

Should lithium-ion battery companies reduce production costs?

The Ministry of Industry and Information Technology unveiled a draft guideline on Wednesday that will guide lithium-ion battery companies to reduce projects that aim solely to expand production capacity. Instead, lithium-ion battery companies will be encouraged to strengthen technological innovation, improve quality and reduce production costs.

What will China's new lithium-ion battery regulation mean for the battery industry?

China's industrial regulator plans to launch a major document to guide the production capacity of lithium-ion batteries, which industry experts said will knock out a batch of low-end battery cells and accelerate the structural adjustment of the country's booming lithium-ion battery sector.

What will China's Lithium-ion battery production capacity be in 2025?

The China Automotive Power Battery Industry Innovation Alliance predicted that by 2025, the country's lithium-ion battery production capacity will likely exceed 3,000 GWh. However, the capacity utilization rate of the country's lithium-ion battery industry dropped to about 40 percent last year and is likely to reach 35 percent by 2025.

How many battery Gigafactory projects have been cancelled or postponed in China?

In the first seven months of the year, 19 battery gigafactory projects were cancelled or postponed in China, according to London-based research firm Benchmark Mineral Intelligence. That has only accelerated an existing pullback of investment into battery plants as electric-vehicle manufacturers -- mainly in Europe -- grapple with slowing sales.

Will China's battery Gigafactory capacity be reduced by 3 per cent?

"A lot of consolidation has occurred at Chinese facilities where low prices, combined with struggles with yield, means companies have abandoned plans," said Benchmark analyst Evan Hartley. He has estimated that these cancellations would reduce China's battery gigafactory capacity for 2030 by 3 per cent.

o Purchase NEV credits from other companies. WHY DID THE MINISTRY OF INDUSTRY AND INFORMATION TECHNOLOGY (MIIT) REVISE THE POLICY? In addition to the fact that the Phase 1 targets did not extend beyond 2020, MIIT also intended to accomplish the following with Phase 2: »

The Ministry of Industry and Information Technology's latest response to battery companies

Encourage fuel efficiency technologies. In order to encourage the ...

The Ministry of Industry and Information Technology responded that the amount of waste electric vehicle batteries is increasing along with the rapid increase in the number of electric vehicles, and that the promotion of recycling of waste power batteries is important for the sustainable development of the new energy vehicle industry in order to protect the ...

The magazine will be published in Apr 2024 and distributed at the ChemExpo 2024 in Mumbai, India. And online for permanent download."Fine Chemicals Industry Overview" provides not only comprehensive information about the international chemical market but also offers overseas readers with the opportunity to understand and track the dynamics and trends ...

Owing to the high technical requirements and high cost of power battery recycling, the Ministry of Industry and Information Technology of China has announced a "whitelist" ...

China's Ministry of Industry and Information Technology in June finalised revised guidelines for the country's lithium-ion battery industry, which set higher standards for ...

In the wave of digitalization and green energy, electric vehicles (EVs) have become the rising stars of the global automotive industry. However, with the rapid popularity of electric vehicles, their safety issues have also attracted increasing attention from the public and the industry. On June 11, the official website of China's Ministry of Industry and Information Technology released a ...

The latest advancements and strategic directions of China's power battery industry have been highlighted at the 2024 World Power Battery Conference held in the city of Yibin, southwest China's ...

The Industrial Registry is a digital platform allowing customers and companies to register their information annually,) in line with Federal Decree-Law No. 25 of 2022 and its executive ...

From January to February 2022, China's lithium-ion battery industry maintained a rapid growth trend, according to enterprise information announcements and research institutions" estimates, the total domestic lithium battery output exceeds 82GWh. In the lithium-ion battery segment, the output of batt

Information Technology (MIIT), Ministry of Science and Technology (MOST), and National Development and Reform Commission (NDRC) jointly released A Notice on Optimizing Fiscal Subsidies for Promoting New Energy Vehicles (hereafter "the Notice").¹ In the Chinese context, new energy vehicles (NEVs) refer to battery

On May 8th, according to a message on the website of the Ministry of Industry and Information Technology

The Ministry of Industry and Information Technology s latest response to battery companies

(MIIT), in order to further strengthen the management of the ...

China is keen to optimize the management policies of the power battery industry, strengthening the overall planning of the industry's development while guiding rational investment to avoid blind expansion and disorderly development, said Xin Guobin, vice-minister of the Ministry of Industry and Information Technology, on Friday during a power battery forum in ...

[the Ministry of Industry and Information Technology issued a new version of the interim measures for the regulation and announcement of the lithium-ion battery industry] on December 10, the Ministry of Industry and Information Technology announced that in order to further strengthen the management of the lithium-ion battery industry and promote the ...

China's Ministry of Industry and Information Technology (MIIT) on Wednesday unveiled revised guidelines for the lithium-ion battery industry to further strengthen standardized...

In response to this issue, Xin Guobin, Vice Minister of the Ministry of Industry and Information Technology, gave an explanation at the State Council's regular policy briefing held on November 3. Xin Guobin said that the 20% target is mainly considered from two aspects. The first is to consider from the perspective of green development.
