

Does Spain have a battery factory?

Spain is a clear beneficiary of this mixed situation. Having its own battery factory with low-cost LFP cells is a real competitive advantage for the three Stellantis plants in Zaragoza, Vigo and Madrid - especially as Stellantis has already announced that it will build small electric cars based on the upcoming STLA Small platform in Spain.

Will Stellantis build a battery factory in Spain?

Stellantis and Chinese battery maker CATL will invest 4.1 billion euros (\$4.33 billion) to build one of Europe's largest electric vehicle battery factories in Spain, encouraged by lower costs and government funding.

Where are LFP batteries made?

The two companies are investing up to 4.1 billion euros in the factory for LFP battery cells in Zaragoza near an existing Stellantis plant. (UPDATE BELOW) The new LFP battery production plant from Stellantis and CATL is scheduled to go into operation at the end of 2026. The goal is an annual capacity of up to 50 GWh in a later expansion stage.

Will CATL be a partner for LFP batteries in Spain?

In November 2023, the car manufacturer officially announced its partnership with CATL for LFP batteries in Europe, and Spain became the subject of focus when, in January 2024, CATL was also mentioned in the Spanish media as a likely project partner in the country.

Who makes electric car batteries?

Founded in 2011 in Ningde, eastern China, CATL produces more than a third of the electric vehicle batteries sold in the world. Italian-US-French company Stellantis produces 14 brands including Fiat, Peugeot-Citroen, Opel, Maserati, Chrysler, Ram and Jeep.

Why is Europe trying to attract EV battery makers to Europe?

Europe has been seeking to attract EV battery makers to build factories in the region - home to car makers such as Volkswagen and Stellantis - as it tries to cut a reliance on Asia and win a green subsidies race with the United States. VOTE ABSTENTION

"Battery-News" presents an up-to-date overview of planned as well as already existing projects in the field of battery cell production. As usual, the relevant data come from official announcements of the respective players ...

BARCELONA, Spain (AP) -- Chinese electric battery company CATL and automaker Stellantis will build a major battery factory in northern Spain, the partners announced Tuesday. They said the plant will be located in

Zaragoza and start producing lithium iron phosphate batteries by the end of 2026. The joint venture represents an investment of 4.1 ...
