

The loft platform can be used to install solar panels

Do you need solar panels for a loft conversion?

Most loft conversions or renovations involve windows or roof modifications. Having your solar panels put in with your skylights, can ensure the tradesmen are working together to deliver exactly what you have in mind. And if for some reason you can't do them together?

How does a solar panel installation platform work?

The solar panel installation platform can be transported easily in a transit van or on a roof rack, and it assembles within minutes. Its lightweight construction also allows the platform to be lifted and shifted around the worksite without disassembly, making it ideal for projects that require flexibility.

What is EASI-Dec's solar access platform?

Easi-Dec's Solar Access Platform is a fully compliant, innovative solution designed to streamline the installation and maintenance of roof-mounted solar panels. Our platform allows easy, quick access to roofs, ensuring safety and efficiency in every project.

What is a solar-DEC access platform?

Designed for safe roof access during solar panel installation, the Solar-Dec Access Platform provides a strong, stable work surface. The SolarLine Access System consists of a Solar-Dec platform integrated with a hoist and connected by an Easi-Dec Catwalk to an Easi-Dec standard platform.

Can you build a loft conversion more sustainably?

It's not so much of a pain anymore. There are so many ways, both big and small, to build loft conversions (or any project) more sustainably. But you have to have the right people for this. Not all contractors or tradesmen will be knowledgeable enough to help you build or renovate sustainably.

What is included in a solar panel installation package?

It includes the Solar-Dec Platform or SolarLine Access System for roof-level access, the Solar Bridging Ladder, and the CoverSafe Spark for loft work. This all-in-one package ensures your team can work safely at every stage of solar panel installation.
