

Why are my solar panels not working?

Your solar panels not working could be from several different issues, including: 1. Lack of sunlight If your solar panels are shaded or concealed by trees, buildings, or debris, they may not receive enough sunlight to perform correctly. So, when installing solar panels, it's best to have them in a suitable location to avoid this issue.

Do you have problems with your solar panels?

Nearly seven in 10 owners had had no problems with their solar panels in our survey of over 2,000 owners.\* The most common - and most serious - problem owners face is with the inverter. In some cases inverter problems mean you don't get any usable renewable electricity. It can also be a pricey problem to fix.

Why are my solar panels underperforming?

Here are some common reasons your solar panels might be underperforming: The Dirt: Just as plants need clean leaves to photosynthesize effectively, your solar panels need clear surfaces to catch the sun's rays. Dirt, dust, leaves, or even bird droppings acting like a layer of shade could be the culprit.

What if my solar panel system is unresponsive?

If your solar panel system is unresponsive, then nine times out of ten, there is usually a solution. In the first instance, it is worth taking a look at the panels themselves - if they're in an accessible and safe place - to gauge what the issue could be.

What causes a faulty solar panel system?

Probably the most common issue found on faulty solar panel systems isn't actually the panels themselves - it's all down to the inverter. The inverter converts the direct current (DC) generated by the panels into alternating current (AC), which powers the electrical components around your home.

What happens if a solar system is not connected to the grid?

If you have a solar system that is not connected to the grid, then batteries can be used to help store the electricity produced by the panels. These batteries are subject to a number of problems, including overcharging and undercharging. Battery problems can lead to power outages and even fires if the maintenance process is negligent.
