

Does ENVA recycle lead acid batteries?

As an end of life lead acid battery facility, Enva provide a complete battery recycling service for all types of lead acid batteries, using the latest technology to enable us to extract 99.5% of lead ready for re-use in the production of batteries and other lead-based products.

What are lead acid batteries?

Lead acid batteries are one of the earliest types of rechargeable batteries. Developed in the 1800s, they still have advantages over newer technologies being low cost, robust and reliable. Their wide-ranging applications benefit diverse environments;

How do I identify a lead acid car battery?

This is in addition to our well-established collection and recycling of lead acid car batteries. Batteries are identified with a crossed out wheeled bin symbol. Underneath this symbol there will be a chemical symbol, if the battery contains more than 0.0005% mercury (Hg) or more than 0.002% cadmium (Cd) or 0.004% lead (Pb).

Where can I recycle AA batteries?

For getting rid of household battery waste - such as AA batteries - this means you can usually visit your nearest large supermarket to recycle batteries. Otherwise, check if your local authority accepts old batteries for recycling or visit your local household waste recycling centre, where there should be a battery bin. Batteries recycled?

What is alkaline battery recycling?

Alkaline battery recycling - Recycling alkaline batteries (such as AA and AAA batteries), follows the same separation process. This isolates the zinc, manganese, steel, and any other components for reuse in new products.

Where can I find a chemical symbol for a Halfords battery?

However a 1cm x 1cm crossed out wheeled bin and the appropriate chemical symbol can be found on the back of the packaging. Halfords is a member of ERP UK Ltd and make a financial contribution to cover the costs of recycling these domestic batteries. Halfords is registered as a producer of batteries in the UK.
