What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

Can solar panels be mounted on a wall?

Roof-mounted solar panels are usually titled at a 20-50 degree angle, which allows them to capture sunlight when the sun is high in the sky. But most wall-mounted panels are parallel to the wall, or only slightly tilted. It's also harder to fit as many solar panels on a wall as you would on a roof.

Why are wall-mounted solar panels more expensive?

Wall-mounted solar panels can also be more expensive to install than roof-mounted systems because they require extra strong anchors to keep them securely attached. Installers will also probably have easier access to the roof - especially on flat roofs where they can walk about.

Are wall-mounted solar panels better than a roof-mounted system?

Wall-mounted solar panels are usually less effective than roof-mounted systems because they often have a steeper angle, so they don't receive as much sunlight throughout the day. Roof-mounted solar panels are usually titled at a 20-50 degree angle, which allows them to capture sunlight when the sun is high in the sky.
