

# What do I need to add when using a battery pack

How do I choose a battery pack for my laptop?

A compatible battery pack should be able to plug into the power port on your laptop. If you have a laptop with USB-C ports, you might want to get a battery pack with a USB-C connector. High-capacity connectors (like USB-C and Thunderbolt) can transfer a larger amount of power quickly, which means they can charge your laptop faster.

What is a mobile battery pack?

A lightweight power bank or mobile battery pack that you can carry anywhere. They go under different names: battery packs, power banks, portable chargers, fuel banks, pocket power cells and back-up charging devices to name just a few. But whatever you call them, they all do the same thing. Charge your phone or tablet without needing a power outlet.

How do you charge a battery pack?

Instead of plugging your charging cable into the wall, you instead plug the charging cable into the battery pack and fill up the device's batteries that way. Not all battery packs are created equal, however, and even if the build quality is good, you can easily end up with an external battery pack that doesn't fit your application and power needs.

Do you need an external battery pack?

Modern gadgets are power hungry. If you want to make it through a long commute or a cross-country flight without having to plug your tablet or gaming device in, you're going to need an external battery pack to keep the electrons flowing. Read on as we show you how to shop for a pack that will meet your needs and keep your screens glowing.

Do you need a battery pack for a presentation?

By the time you arrive, your laptop has just enough charge (if not a full charge, depending on your battery pack) to give your presentation. A battery pack could also get you some brownie points if anyone else in the conference room needs a charge. Pro tip: Always keep a charged battery pack in your office so you'll have one when you need it. 3.

Does a USB port fit a battery pack?

Technically the standard USB port on your battery pack (aka power bank) will fit any standard USB cable. However, the amount of power it can provide may vary. A 1 amp USB port will charge your smartphone or tablet but may charge slowly, even if the battery is big enough to charge your smartphone more than once.
