

What is a battery code?

Battery Codes: Battery codes are typically found on the battery and consist of a sequence of numbers and letters indicating the battery's technical characteristics. These codes reveal the battery's voltage, amperage, dimensions, and manufacturing date. Knowing the correct battery code can assist you in selecting the right battery for your vehicle.

What is a battery date code?

Battery date codes are typically stamped on the top or side of the battery. The code consists of a letter and a number. The letter represents the month the battery was manufactured, while the number represents the year. For example, if you see a code that reads "A17," the "A" represents January, and the "17" represents 2017.
