

What should I pay attention to when refitting solar panels

What should I do if a solar panel changes my fit eligibility?

Recommendations: Contact your FIT provider: Before making any modifications, consult your FIT provider (usually your electricity supplier) to confirm if it affects your FIT eligibility. Solar panel upgrades and "splitting" solar.

Should I upgrade or expand my solar panel system?

Upgrading and expanding your existing solar panel system could be your answer. When it comes to solar energy, maximizing efficiency and optimizing performance are crucial.

How do I know if my solar system is bad?

Weather and wildlife can do damage over time, especially if your system is old and easily damaged. Check the physical condition first by carefully examining the panels for cracked or scratched glass and discolouration. Also, shine a torch underneath to examine cabling to make sure there are no broken connections.

Should you upgrade or replace your solar panels?

Old solar panels, while still functional, might not be harnessing solar energy as effectively as the newer models. Replacing or upgrading to a more advanced model can thus translate to more electricity generation from the same square footage. Economic logic often drives homeowners and businesses to consider upgrades.

How do you know if a solar panel needs replacement?

Physical signs such as yellowing, delamination, or even broken glass are evident indicators that a solar panel may need replacement. Such damages can impede the panel's ability to function effectively. A consistent decline in power output, despite regular maintenance and optimal conditions, often signals degradation in the photovoltaic cells.

Should I upgrade my solar system?

To determine if upgrading is the best option for your solar system, assess its performance, consider your energy needs, and consult with a professional solar installer. They can provide expert advice on optimizing your solar infrastructure and expanding its capacity to meet your evolving energy requirements.
