

## Where can I get the dedicated battery pack

Should you buy a power bank or a dash cam battery pack?

When considering whether to buy a power bank or a dash cam battery pack, it's important to keep in mind that while Amazon Power Banks are less expensive, there are some factors to consider.

How does the iVOLT battery pack work?

The iVOLT Battery Pack only draws power to charge when you are driving the vehicle, which prevents damage to the vehicle's battery over time. With the ignition off, the Dash Cam relies solely on the Battery Pack for power, completely eliminating the need to draw power from the vehicle's battery.

Do I need a battery pack for my dash cam?

For safety, reliability, and the capability to power up your dash cam, we highly recommend using a dedicated battery pack like the PowerCell 8. There are reasons to get a dedicated battery pack instead of a powerbank, as explained in this comparison video by Vortex Radar.

What is the difference between a USB Power Bank and a battery pack?

In this article, we will compare a dedicated dash cam battery pack, specifically the BlackboxMyCar PowerCell 8, to a USB power bank. The primary difference between the two is the battery technology: the portable USB battery packs are made of lithium-ion, while the PowerCell 8 uses a different battery technology.

What is the PowerCell 8 battery pack?

The PowerCell 8 battery pack is a 5V USB 3.0 power outlet that can be used to charge your laptop, smartphone, and other USB-powered devices, similar to USB Power Banks. It can be used to add a mobile router to the dash cam setup in vehicles, making it ideal for those who have a Cloud-ready dash cam.

How do I connect a battery pack to a Thinkware dash cam?

**Power Input (from vehicle):** connect the battery pack 2-wire input power wire harness to a ground point and also to the fuse panel using one of the included "plug and play" fuse taps. **Power Output (to Thinkware dash cam):** connect the battery pack 3-wire output wire harness to a Thinkware direct-wire harness, not included.

Not recommended to use a Li-Ion battery pack for a dashcam. People use it, and will tell you it's fine, but it's not a good idea. You should be using a LiFePO4 battery pack that is designed for a dashcam. ... With a dedicated dashcam battery, you'll get up to ...

Mechanical devices like a switch can be prone to failure. The ones that come with radios are not the highest quality high quality. The main power battery has much more robust wiring and connectors, and there is no switch. My favorite BES is the new CC BEC 2.0. I really like the fact that I can easily program it for any

## Where can I get the dedicated battery pack

voltage..

It is also super light and can work for a long time.133g makes it very convenient to carry. The working time lasts about 16 hours, making it the perfect companion for travel. If not enough, you can use the SmartGo Pokefi ...

I also did note that the battery does get hot when charging my cellphone. Overall, as an upgraded 4v battery it does a great job for its intended purpose, and the power bank feature will work great in a pinch/emergency, but I can't say I ...
