

Which battery cabinet is better in Kathmandu

How to fill the gap in demand of lead acid batteries in Nepal?

The vision is to fill the gap in demand of lead acid batteries in Nepali market by manufacturing, using high-grade raw materials, here in Nepal. The company started battery production since September 2013 A.D and launched the first batch of products in January 2014 A.D.

Are battery units rack-mounted or cabinet-mounted?

Based on the size, the batteries are rack-mounted if they are above 100 AH and used in cabinets if they are below that level. The number of battery units and the respective size of the battery determines rack or cabinet usage.

Are lead acid batteries rack-mounted?

The lead acid batteries which require proper ventilation are rack-mounted as per the general standards as compared to VRLA Batteries which use racks or cabinets. Based on the size, the batteries are rack-mounted if they are above 100 AH and used in cabinets if they are below that level.

Why should you choose a custom battery cabinet design?

The unique selling point of a custom battery cabinet design is the flexibility it offers concerning simplicity in access. The neat arrangement of cables and grouping them or naming them as per their usage becomes naturally easy.

Why do we need a battery cabinet & rack?

Physical observation of a battery is key in the maintenance of batteries in string and in avoiding undue incidents. The battery cabinets and racks make this task easy by having an orderly arrangement of batteries. Concerning maintenance, the proactive approach reaps rich benefits over a reactive measure.

Where are the batteries made in India?

The company started battery production since September 2013 A.D and launched the first batch of products in January 2014 A.D. The manufacturing plant is currently at Budhiganga Gaupalika -4, Biratnagar, Morang.

If the cabinet is used by several people at the same time, on the other hand, a battery charging cabinet with many individual, separately lockable compartments may be a better choice. What's more, in the event of a technical mishap, not all charging stations are automatically affected, as long as they are connected to separate electrical systems.
