

Are there any good capacitor brands?

There are many good capacitor brands. Not in particular order.. I personally prefer Rubycon but for reasons of availability do sometimes use Panasonic/nichicon. There are also many other ok brands but i prefer the above.

Re: Capacitor brands? Don't ever buy capacitors from China. Especially top brands from the post above.

Should I buy capacitors from China?

Don't ever buy capacitors from China. Especially top brands from the post above. In addition to those there are: Vishay and Kemet are not "premium" grade electrolytic manufacturers. Kemet makes fine poly's and Vishay makes fine ceramic caps. I would not recommend either as first choice for Electrolytics.

Where can I buy a capacitor?

Capacitors seem to be one of those things that is counterfeited a lot, so definitely want to buy from good sources like Digikey, Mouser etc. Avoid Ebay, Aliexpress, Amazon etc as you don't know what you're getting. Re: Capacitor brands? Vishay and Kemet are not "premium" grade electrolytic manufacturers.

Are third-tier capacitors a good choice?

These third-tier capacitors, according to information from various PSU manufacturers and people with knowledge of RMA statistics, along with our own experiences with caps, might not be among the best choices, but are still a grade above the caps that belong to the last category. This group includes the rest of the capacitor brands.

Are Japanese capacitors safe?

When it comes to electrolytic caps, since they are hugely affected by increased temperatures caused by heat build-up at the PSU's internals (but mostly by current ripple), the caps made by Japanese manufacturers are the safest and highest-quality choice. This is also why Japanese capacitors are always preferred.

Why are capacitor manufacturers important?

Most older companies were founded during the AM radio era, which includes the World War II era and post war era. As the demand for advanced electronics continues to grow, the role of capacitor manufacturers becomes increasingly vital, supporting crucial domains like consumer electronics, power systems, automotive technology, and telecommunications.

However, I did use some 4700uF (IIRC) Wurth caps as output capacitors on a Marantz 1060 as part of a full restoration, and I would swear it was the best sounding 1060 I've ever had. Seems like I used some on the outputs of a 2015 with equally pleasing results as well.

With new brands coming and old brands going, compiling a list of good/bad brands is a hopeless exercise, so

the question is: How do I know a decent/good quality electrolytic capacitors, before I buy them? Let's assume: I know the brand (by calling/mailling the shop); The parts are genuine, non-counterfeits;

I'd suggest reading the Humble Homemade HiFi Cap Test thor Tony Gee does a good job of describing the audible differences between various brands of capacitors. In my personal experience, the test results are spot-on with what I've also heard.

I find that you need to go for higher voltage ratings to get good capacitors too. The smaller the can is, the worse the capacitor seems to perform (within reason!). So instead of using a 16 VDC capacitor, you may need to go up to 50 or 63 VDC to equal the performance of one you are replacing..-Chris . T. tms0425.

It is a misconception that the capacitors need to be replaced after a few years. I have had devices here that were more than 30 years old and the capacitors were faultless. ...
